

TOGETHER, WE WILL ACHIEVE A BRIGHT FUTURE.

Autism is complex, and we are committed to helping each family build a roadmap to success.

Care is at the Center of Everything We Do

Our dedicated team works directly with children, their family, and their network of professionals to achieve meaningful outcomes through evidence-based therapies and techniques.

There is No "Typical" ABA Therapy Session

We assess each child's individual motivations and needs, and design every ABA session based on the child's goals and response to treatment.

We Live Every Day by These Clinical Values

Early Intervention Program

Our Early Intensive Behavioral Intervention (EIBI) treatment model is designed for children birth to three years old. Developmentally appropriate, empirically validated assessment tools and caregiver input are used to develop a treatment plan for each child that is person-centered and individualized.

Our approach to treatment is naturalistic, using everyday family routines to foster the development of skills and promote independence. Our programs focus on increasing each child's motivation to learn, making each session both fun and functional. We strive to provide superior personalized care and adapt to the needs of the child, their family, and the environment.

Parents and Caregivers Play a Critical Role

Skills acquired through ABA must be carried over outside of therapy hours so learning can be supported throughout the day. Parents' caregivers' learning, knowledge, and implementation of the ABA treatment plan and strategies are essential to the child's success. We believe that working in unity can make the future bright for each child and family.

Regions We Serve

Boston

- Allston
- Back Bay
- Bay Village
- Brighton
- Chinatown
